

Mr Brain Printable Puzzles

Teacher Resource #2

A small collection of printable puzzles designed for classroom use, early finishers, brain breaks, or quiet independent work. This resource includes a mix of visual, number, and logic puzzles with simple instructions and a range of difficulty.

What's Inside:

- 1. Number Search** - Find the hidden number sequences in the grid, just like finding words in a word search. Numbers may go across, down, diagonally, or backwards.
- 2. Math Pyramid** - Add the two numbers next to each other to find the number above them. Continue until you reach the top.
- 3. Hitori** - Shade some numbers so that no number repeats in any row or column. Shaded squares cannot touch side by side, and all unshaded squares must stay connected.
- 4. Maze** - Find a path from the start to the finish without crossing the walls.

Suggested use: Individual work, early finisher activity, brain break, homework, or small-group practice.

Designed for elementary-age puzzle solvers. Teachers can choose activities based on their students' experience and ability.

Difficulty may vary between individual puzzles.

License & Use

This resource may be printed and used for personal and educational purposes, including classroom use.

You may make copies for your own students or household.

Reselling, redistributing, uploading, or including any part of this resource in another product is prohibited.
